11.8. Casting your vote

11.8.1. Uncontested Council Elections

In uncontested elections, where there is an equal number of candidates for an equal number of places on Council, Members can cast a vote for all or some of the candidates. The result will be based on majority voting, where each candidate receives fifty per cent (50%) of the valid votes cast plus 1. In the event that a candidate receives fifty per cent (50%) of the votes cast or less, their nomination will be considered unsuccessful.

11.8.2. Contested Council Elections

In contested elections, where there are two or more candidates for a single place or for the same office on Council, the following will apply:

- a) Where there are only two candidates for the place or office, Members will vote by selecting one of the candidates as their preferred candidate. The candidate who receives the highest number of votes will be elected..

- b) Where there are three (3) or more candidates for the place or office, Members will vote by indicating '1' next to the name of candidate who is their first choice, '2' next to their second choice of candidate etc. Members do not have to list all their preferences and may only vote for a single candidate or for fewer candidates than are standing for election.

A candidate is deemed to have won if they receive fifty per cent (50%) plus 1 of the votes cast in favour of them as first choice.

If in the first voting-round nobody receives over fifty per cent (50%) of the votes cast in their favour as first choice then the candidate with the least number of votes cast in their favour as first choice is eliminated. All the votes that the eliminated person received in their favour as first choice are then transferred to the other candidates according to the voter preference on those voters' ballot papers.

This process continues until a candidate receives over fifty per cent (50%) of the votes cast or, when only two (2) candidates are left, the candidate who receives the highest number of votes is elected..
